SECTION 5 - FIRE-FIGH	TING MEASURES
5.1 Suitable Extinguis	hing Media
Extinguishing Media	: Water, carbon dioxide, dry chemical, universal aqueous film forming foam.
Unsuitable Media	: Water jet.
5.2 Specific Hazards A	rising from the Chemical or Mixture
Hazardous Combustion Products	: Decomposition products may include: oxides of carbon, smoke, vapors. See also Section 10.6.
Specific Hazards During Firefighti	
5.3 Special Protective	Actions for Fire-Fighters
Firefighting Instructions	: Use water spray to cool fire exposed aerosol containers, as contents can rupture violently from heat developed pressure.
Protection during Firefighting	: Firemen should wear self-contained breathing apparatus with full face-piece operated in positive pressure mode.
	AL RELEASE MEASURES
SECTION O ACCIDENT	
6.1 Personal Precaution	ons, Protective Equipment and Emergency Procedures
For Non-Emergency Personnel	: Do not touch or walk through spill. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. No action should be taken involving any personnel without suitable training. Remove ignition sources and provide adequate ventilation only if it is safe to do so.
For Emergency Personnel	: Observe precautions provided for non-emergency personnel above. Use personal protection as recommende in Section 8.
6.2 Environmental Pre	ecautions
Environmental Precautions	: Keep out of drains, sewers, ditches, and waterways. Minimize use of water to prevent environmental contamination.
6.3 Methods and Mat	erials for Containment and Cleaning up
Containment Procedures	: Product is an aerosol, therefore spills and leaks are unlikely. In case of rupture, released content may be contained with oil/solvent absorbent pads, socks, and/or absorbents.
Cleanup Procedures	: Spills from aerosol cans are unlikely and are generally of small volume. Large spills are therefore not normally considered a problem. In case of actual rupture, avoid breathing vapors and ventilate area well. Remove sources of ignition and use non-sparking equipment. Soak up material with inert absorbent and place in safety containers for proper disposal.
Other Information	: Aerosol products represent a limited hazard and will not spill or leak unless ruptured. In case of rupture contents are generally evacuated from the can rapidly. Area should be ventilated immediately and continuous ventilation provided until all fumes and vapors have been removed. Aerosol cans should never be incinerated or burned.
Prohibited Materials	: Combustible absorbent material such as sawdust. Use of equipment that may cause sparking.
SECTION 7 - HANDLING	G AND STORAGE
7.1 Precautions for Sa	fe Handling
General Handling Precautions	KEEP OUT OF THE REACH OF CHILDREN. Avoid prolonged or repeated skin contact. Avoid breathing of vapor Do not incinerate (burn) containers. Always replace overcap when not in use. Avoid use around open flames or other sources of ingiting. Expansive to best or prolonged experience to sup may source can to burst. Use only

or other sources of ignition. Exposure to heat or prolonged exposure to sun may cause can to burst. Use only

: Do not eat, drink or smoke when using this product. Wash hands thoroughly after use. Remove contaminated

with adequate ventilation, opening doors or windows to achieve cross-ventilation.

clothing and protective equipment before entering eating or smoking areas.

Storage Requirements

 Storage of individual cans should be done in an area below 55°C (120 °F), and away from heat sources. Ensure can is in a secure place to prevent knocking over and accidental rupture. For storage of pallet quantities, compliance with NFPA 30B (Manufacture and Storage of Aerosol Products) is recommended.
 Segregate storage away from materials indicated in Section 10.

SECTION 13 - DISPOSAL CONSIDERATIONS

13.1 Waste Treatment Methods

Waste Disposal	: Characteristics and waste stream classification can change with product use and location. It is the responsibility of the user to determine the proper storage, transportation, treatment, and/or disposal methodologies for spent materials and residues at the time of disposition. All waste must be disposed of in compliance with the respective national, federal, state, and/or local regulations.
Waste Disposal Of Packaging	: In the United States, an aerosol container that does not contain a significant amount of liquid would meet the definition of scrap metal (40 CFR 261.1(c)(6)), and would be exempt from RCRA regulation under 40 CFR 261.6(a)(3)(iv) if it is to be recycled. If containers are to be disposed of (not recycled) it must be managed under all applicable RCRA and state regulations.
Landfill Precautions	: Not Available.
Incineration Precautions	: ** DO NOT INCINERATE ** CONTENTS UNDER PRESSURE **.
