#### **SECTION 4 - FIRST-AID MEASURES**

#### 4.1 Description Of First-Aid Measures

**General Measures** : IF exposed or concerned: Get medical advice/attention.

**Eye Contact** : Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do.

Continue rinsing. If eye irritation persists: Get medical advice/attention.

**Skin Contact** : Wash skin with plenty of water. Take off contaminated clothing. If skin irritation or rash occurs: Get

medical advice/attention.

**Ingestion** : Call a poison center or a doctor if you feel unwell.

**Inhalation** : Remove person to fresh air and keep comfortable for breathing.

**First-Aid Responder Protection** : Wear adequate personal protective equipment based on the nature and severity of the emergency.

#### 4.2 Most Important Symptoms And Effects, Both Acute And Delayed

**Eye Contact** : Eye irritation.

**Skin Contact** : May cause an allergic skin reaction.

**Ingestion** : Due to being an aerosol, the product does not lend itself to ingestion. Should ingestion occur, it may

cause irritation to membranes of the mouth, thorat, and gastrointestinal tract resulting in vomiting and/or cramps. Aspriation of vomit into the lungs may cause inflammation, and possible chemical

pneumonitis, bronchopneumonia, or pulmonary edema.

**Inhalation** : Prolonged or repeated overexposure is anesthetic. May cause irritation of the respiratory tract, or acute

nervous system depression characterized by headache, dizziness, staggering gait, confusion or death.

Irritation of the mucous membranes, coughing, and dyspnea are also possible.

#### 4.3 Indication Of Immediate Medical Attention And Special Treatment

 Notes To Physician
 : Treat symptomatically.

 Specific Treatments/Antidotes
 : No Information Available.

 Immediate Medical Attention
 : No Information Available.

#### **SECTION 5 - FIRE-FIGHTING MEASURES**

#### 5.1 Suitable Extinguishing Media

Extinguishing Media : Water, carbon dioxide, dry chemical, universal aqueous film forming foam.

Unsuitable Media : Water jet.

### 5.2 Specific Hazards Arising From The Chemical Or Mixture

**Decomposition Products** : Decomposition products may include: oxides of carbon, smoke, vapors.

**Hazards From The Product** : Extremely flammable. Contents under pressure. In a fire or if heated, a pressure increase will occur

which may result in container bursting. Vapors heavier than air may spread along the ground and travel

to ignition an source.

#### 5.3 Special Protective Actions For Fire-Fighters

**Protective Actions** : Use water spray to cool fire exposed aerosol containers, as contents can rupture violently from heat

developed pressure.

**Protective Equipment** : Firemen should wear self-contained breathing apparatus with full face-piece operated in positive

pressure mode.

### **SECTION 6 - ACCIDENTAL RELEASE MEASURES**

Part No. 11175Z Aerosol

Print Date: 11/02/2016 Revision Date: 11/02/2016 Version: 5.0 (EN) Page 4 of 12

#### 6.1 Personal Precautions, Protective Equipment And Emergency Procedures

For Non-Emergency Personnel

: No action should be taken involving any personnel without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spill.

Remove ignition sources and provide adequate ventilation only if it is safe to do so.

**For Emergency Responders** 

: Use personal protection as recommended in Section 8. Observe precautions provided for non-emergency personnel above.

#### 6.2 Environmental Precautions

**Precautions** 

: Keep out of drains, sewers, ditches, and waterways. Minimize use of water to prevent environmental contamination.

#### 6.3 Methods And Materials For Containment And Cleaning Up

**Containment Procedures** 

: Product is an aerosol, therefore spills and leaks are unlikely. In case of rupture, released content may be contained with oil/solvent absorbent pads, socks, and/or absorbents.

**Cleanup Procedures** 

: Spills from aerosol cans are unlikely and are generally of small volume. Large spills are therefore not normally considered a problem. In case of actual rupture, avoid breathing vapors and ventilate area well. Remove sources of ignition and use non-sparking equipment. Soak up material with inert absorbent and place in safety containers for proper disposal.

Other Information

: Aerosol products represent a limited hazard and will not spill or leak unless ruptured. In case of rupture contents are generally evacuated from the can rapidly. Area should be ventilated immediately and continuous ventilation provided until all fumes and vapors have been removed. Aerosol cans should never be incinerated or burned.

**Prohibited Materials** 

: Combustible absorbent material such as sawdust. Use of equipment that may cause sparking.

### **SECTION 7 - HANDLING AND STORAGE**

#### 7.1 Precautions For Safe Handling

**General Handling Precautions** 

: KEEP OUT OF THE REACH OF CHILDREN. Avoid prolonged or repeated skin contact. Avoid breathing of vapors. Do not incinerate (burn) containers. Always replace overcap when not in use. Avoid use around open flames or other sources of ignition. Exposure to heat or prolonged exposure to sun may cause can to burst. Use only with adequate ventilation, opening doors or windows to achieve cross-ventilation.

**Hygiene Recommendations** 

: Do not eat, drink or smoke when using this product. Wash hands thoroughly after use. Remove contaminated clothing and protective equipment before entering eating or smoking areas.

#### 7.2 Conditions For Safe Storage Including Any Incompatibilities

**Storage Requirements** 

: Storage of individual cans should be done in an area below 55°C (120°F), and away from heat sources. Ensure can is in a secure place to prevent knocking over and accidental rupture. For storage of pallet quantities, compliance with NFPA 30B (Manufacture and Storage of Aerosol Products) is recommended.

Incompatibilities
NFPA 30B Classification

: Segregate storage away from materials indicated in Section 10.: This product is classified as a Level 3 Aerosol per NFPA 30B.

#### 8.2 Exposure Controls

Engineering Measures : Use only with adequate ventilation. General ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. Local exhaust ventilation or an enclosed

 $hand {\it ling system may be necessary to control air contamination below that of the lowest OEL from the}$ 

table above.

**Respiratory Protection**: An approved respirator with an organic vapor cartridge may be permissible under certain circumstances where airborne concentrations are expected to exceed occupational exposure limits. If respirators are

where airborne concentrations are expected to exceed occupational exposure limits. If respirators are needed, in the United States compliance with OSHA standard 29 CFR 1910.134 is necessary.

**Skin Protection** : For brief contact, no precautions other than clean body-covering clothing should be needed. When

 $prolonged\ or\ repeated\ contact\ could\ occur,\ use\ protective\ clothing\ impervious\ to\ the\ ingredients\ listed$ 

in Section 2.

**Eye/Face Protection** : Safety glasses with side shields are recommended as a minimum for any type of industrial chemical

handling. Where eye contact with this material could occur, chemical splash proof goggles are

recommended.

**Other Protective Equipment** : Safety showers and eye-wash stations should be available in the workplace near where the material will

be used

### **SECTION 13 - DISPOSAL CONSIDERATIONS**

#### 13.1 Waste Treatment Methods

Waste Disposal

: Characteristics and waste stream classification can change with product use and location. It is the responsibility of the user to determine the proper storage, transportation, treatment, and/or disposal methodologies for spent materials and residues at the time of disposition. All waste must be disposed of in compliance with the respective national, federal, state, and/or local regulations.

**Waste Disposal Of Packaging** 

: In the United States, an aerosol container that does not contain a significant amount of liquid would meet the definition of scrap metal (40 CFR 261.1(c)(6)), and would be exempt from RCRA regulation under 40 CFR 261.6(a)(3)(iv) if it is to be recycled. If containers are to be disposed of (not recycled) it must be managed under all applicable RCRA and state regulations.

Landfill Precautions : Not Available.

Incineration Precautions : \*\* DO NOT INCINERATE \*\* CONTENTS UNDER PRESSURE \*\*.
