As defined by OSHA's Hazard Communication Standard, this product is hazardous.  
Appearance & Odor: Milky white liquid, mild petroleum odor

### Potential Health Effects:

**ACUTE EFFECTS:**

**EYE:** Contact may cause mild irritation including stinging, redness and tearing.

**SKIN:** Contact may cause mild irritation including redness and itching. Prolonged exposure can cause drying or cracking of skin.

**INHALATION:** Inhalation of small amounts of vapor is not expected to cause health effects. Prolonged or concentrated exposure may lead to irritation of the nose and throat, as well as central nervous system effects such as headaches and dizziness.

**INGESTION:** Ingestion of small amounts is not expected to cause health effects. This product contains petroleum distillates with can be an aspiration hazard. Ingestion of larger amounts can lead to lung inflammation and damage if the petroleum distillates are aspirated into the lungs during swallowing or vomiting.

**CHRONIC EFFECTS:** None known

**Section 5: Fire-Fighting Measures**

---

**Flammable Properties:** This product is nonflammable in accordance with aerosol flammability definitions. (See 16 CFR 1500.3(c)(6) ).

Flash Point: None  
Autoignition Temperature: ND

Upper Explosive Limit: ND  
Lower Explosive Limit: ND

**Fire and Explosion Data:**

Suitable Extinguishing Media: Use Class B extinguishers or an extinguishing agent appropriate for the surrounding fire.

Products of Combustion: Oxides of carbon

Explosion Hazards: Aerosol containers, when exposed to heat from fire, may build pressure and explode.

Protection of Fire-Fighters: Firefighters should wear self-contained, NIOSH-approved breathing apparatus for protection against suffocation and possible toxic decomposition products. Proper eye and skin protection should be provided. Use water spray to keep fire-exposed containers cool and to knock down vapors which may result from product decomposition.

---

**Section 6: Accidental Release Measures**

---

Personal Precautions: Use personal protection recommended in Section 8.

Environmental Precautions: Take precautions to prevent contamination of ground and surface waters. Do not flush into sewers or storm drains.

Methods for Containment & Clean-up: Dike area to contain spill. Ventilate the area with fresh air. If in confined space or

**Product Name: HydroForce® Stainless Steel Cleaner & Polish (aerosol)****Product Number (s): 14424, 74424**

or limited air circulation area, clean-up workers should wear appropriate respiratory protection. Recover or absorb spilled material using an absorbent designed for chemical spills. Place used absorbents into proper waste containers.

---

## Section 7: Handling and Storage

---

**Handling Procedures:** Wash hands after using and before consuming food. Use caution around energized equipment. The metal container will conduct electricity if it contacts a live source. This may result in injury to the user from electrical shock and/or flash fire. For product use instructions, please see the product label.

**Storage Procedures:** Store in a cool dry area out of direct sunlight. Aerosol cans must be maintained below 120 F to prevent cans from rupturing. Store out of reach of children.

**Aerosol Storage Level:** I

### Controls and Protection:

**Engineering Controls:** Area should have ventilation to provide fresh air. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at the source, preventing dispersion into the general work area. Use mechanical means if necessary to maintain vapor levels below the exposure guidelines. If working in a confined space, follow applicable OSHA regulations.

**Respiratory Protection:** None required for normal work where adequate ventilation is provided. If engineering controls are not feasible or if exposure exceeds the applicable exposure limits, use a NIOSH-approved cartridge respirator with organic vapor cartridge. Air monitoring is needed to determine actual employee exposure levels. Use a self-contained breathing apparatus in confined spaces and for emergencies.

**Eye/face Protection:** For normal conditions, wear safety glasses. Where there is reasonable probability of liquid contact, wear splash-proof goggles.

**Skin Protection:** Use protective gloves such as nitrile or PVC. Also, use full protective clothing if there is prolonged or repeated contact of liquid with skin.
