# MATERIAL SAFETY DATA SHEET

Page 1 of 5
Light Argent Metallic
Part No. 12717Z Aerosol
Revision 1 & June 22, 2006

# **EMERGENCY OVERVIEW**

CONTENTS EXTREMELY FLAMMABLE AND UNDER PRESSURE. STORE BELOW 120°F, OUT OF SUNLIGHT, AND AWAY FROM HEAT SOURCES. DO NOT PUNCTURE OR INCINERATE. AVOID CONTACT WITH SKIN AND EYES. VAPOR HARMFUL. HARMFUL OR FATAL IF SWALLOWED. INTENTIONAL MISUSE BY DELIBERATELY CONCENTRATING AND INHALING THE CONTENTS MAY BE HARMFUL OR FATAL.

SUPPLIER:

# SECTION 1 ● CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

The Easthill Group

dba/ The Eastwood Company

263 Shoemaker Road Pottstown, PA 19464

USA & Canada: 800-345-1178

INFORMATION: Outside USA: 610-323-2200

EMERGENCY: Chem-Trec 800-424-9300

PRODUCT NUMBER: 12717Z SUPPLIER NUMBER: 12717Z

PRODUCT DESCRIPTION: Light Argent Metallic Textured Finish

**REVISION NUMBER:** 1

**SUPPLIER PHONE:**

#### **SECTION 2 ● HAZARDOUS COMPOSITION**

INGREDIENT	CAS NUMBER	OSHA PEL	NIOSH REL	ACGIH PEL	IDLH	% WT
Liquefied Petroleum Gas	068476-85-7	1000 ppm	1000 ppm	1000 ppm	2000 ppm	20-30
Xylene	001330-20-7	100 ppm	100 ppm	100 ppm	900 ppm	10-20
Methyl Ethyl Ketone	000078-93-3	200 ppm	200 ppm	200 ppm	3000 ppm	10-20
Acetone	000064-67-1	1000 ppm	250 ppm	500 ppm	750 ppm	< 10
Toluene	000108-88-3	200 ppm	100 ppm	50 ppm	500 ppm	< 10
Polyethylene Wax	009002-88-4	N/E	N/E	N/E	N/E	< 10
Hydrotreated Heavy Petroleum Napahta	064742-48-9	N/E	N/E	N/E	N/E	< 10
Talc	014807-96-6	20 mppcf	2 mg/m3	2 mg/m3	1000 mg/m3	< 10
Aluminum	007429-90-5	15 mg/m3	10 mg/m3	10 mg/m3	N/E	< 10
Ethyl Benzene	000100-41-4	100 ppm	100 ppm	100 ppm	800 ppm	< 10
Stoddard Solvent	008052-41-4	500 ppm	350 mg/m3	100 ppm	20 g/m3	< 10
Quaternary Ammonium Compounds	068911-87-5	N/E	N/E	N/E	N/E	< 10
Zinc Oxide	001314-13-2	5 mg/m3	5 mg/m3	2 mg/m3	500 mg/m3	< 10

# SECTION 3 ● HAZARD IDENTIFICATION

#### **ROUTES OF EXPOSURE:**

NOUTES OF EXPOS	JUIL.	ı							
Skin Contact	1	Skin Absorption	1	Eye Contact	<b>✓</b>	Inhalation	<b>✓</b>	Ingestion	

#### SIGNS AND SYMPTOMS OF ACUTE EXPOSURE

EYE: Liquid contact may cause pain along with moderate eye irritation.

**SKIN:** Prolonged or repeated exposure may cause skin irritation. Repeated contact may cause drying or flaking of skin. May cause more severe response if confined to skin.

**INGESTION:** Due to being an aerosol, the product does not lend itself to ingestion. Should ingestion occur, it may cause irritation to membranes of the mouth, throat, and gastrointestinal tract resulting in vomiting and/or cramps. Aspiration of vomit into the lungs may cause inflammation, and possible chemical pneumonitis, bronchopneumonia, or pulmonary odema.

INHALATION: May cause headache, dizziness.

# OTHER HEALTH HAZARD DATA

**CHRONIC EFFECTS:** Reports of Toluene chronic poisoning describe anemia, decreased blood cell count and bone marrow hypoplasia. Liver and kidney damage may occur. Exposure may affect a developing fetus.

Page 2 of 5 **Light Argent Metallic** Part No. 12717Z Aerosol Revision 1 & June 22, 2006

Chronic effects from Stoddard Solvent ingestion and subsequent aspiration into the lungs may cause pneunatocele (lung cavity) formation and chronic lung dysfunction.

Reports have associated repeated and prolonged occupational overexposure to solvents with irreversible brain and nervous system damage (sometimes referred to as "Solvent or Painter's Syndrome"). Intentional misuse by deliberately concentrating and inhaling this product may be harmful or fatal.

MEDICAL CONDITIONS AGGRAVATED: May aggravate personnel with pre-existing disorders associated with any of the Target Organs. PRIMARY HAZARDS: Sensory Irritation (xylene, acetone, ethyl benzene, methyl ethyl ketone), Narcosis (stoddard solvent, toluene), Systemic Toxicity (butyl cellosolve), Physical Irritation (aluminum)

CARCINOGEN DATA: Ethyl Benzene is listed with IARC as Class 2B (possible human carcinogen) and with ACGIH as A3 (confirmed animal carcinogen with unknown relevance to humans). None of the other ingredients are listed with any agency as carcinogenic.

TARGET ORGANS: Eyes, skin, respiratory system, central nervous system, liver, kidneys

CALIFORNIA PROP 65 WARNING: The product contains a substances known to cause cancer, birth defects or other reproductive harm.

# **OSHA HAZARD CLASSIFICATIONS**

HEALTH HAZARD CLASSIFICATION				PHYSICAL HAZARD CLASSIFICATION						
Irritant	✓	Sensitizer		Combustible	Explosive	Pyrophoric				
Toxic	✓	Highly Toxic		Flammable	Oxidizer	Water Reactive				
Corrosive		Carcinogenic		Compressed Gas 🗸	Organic Peroxide	Unstable				

# SECTION 4 ● FIRST AID MEASURES

INGESTION: Do not induce vomiting! Immediately have the victim drink plenty of water. Do not give milk or digestible oils. Keep airways free. Contact a physician. Never give anything by mouth to an unconscious person.

SKIN: Remove with soap and water. Consult a physician if irritation continues. If large skin area is affected, remove contaminated clothing. EYE: Immediately flush with plenty of clear water for at least 15 minutes. Make sure to flush under the eyelids. Consult a physician.

INHALATION: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Seek medical attention if symptoms persist or if unconscious.

NOTES TO PHYSICIAN: Stoddard Solvent sensitizes the heart to the effects of sympathomimetic amines. Epinephrine and other sympathomimetic drupps may initiate cardiac arrhythmias in individuals exposed. Use of sympathomimetic drups should be avoided. If ingested, the material presents a significant aspiration and chemical pneumonitis hazard. Induction of emesis is not recommended. Consider activated charcoal and/or gastric lavage. If patient is obtunded, protect the airway by cuffed endotracheal intubation or by placement of the body in a Trendelenburg and left later lateral decubitus position.

#### **SECTION 5 ● FIRE FIGHTING MEASURES**

FLASH POINT: Propellant < 0°F

FLAMMABLE LIMITS: Lower (LEL): 1.8% @ 25°C Upper (UEL): 9.5% @ 25°C

**AUTOIGNITION TEMPERATURE: N/Av** 

MEANS OF EXTINCTION: Water, CO2, dry chemical, or universal aqueous film forming foam.

SPECIAL FIRE FIGHTING PROCEDURES: Use water spray to cool fire exposed aerosol containers, as contents can rupture violently from heat developed pressure. Firemen should wear self-contained breathing apparatus.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Contents extremely flammable and under pressure. In addition, when liquid or vapor comes into contact with flames or red hot metal, products of combustion may be created.

#### SECTION 6 ● ACCIDENTAL RELEASE MEASURES

CONTAINMENT PROCEDURES: Product is an aerosol, therefore spills and leaks are unlikely. In case of rupture, released content should be contained as any other solvent spill.

SPILL CLEANUP: Spills from aerosol cans are unlikely and are generally of small volume. Large spills are therefore not normally considered a problem. In case of actual rupture, avoid breathing vapors and ventilate area well. Remove sources of ignition and use non-sparking equipment. Soak up material with inert absorbent and place in safety containers for proper disposal.

SPECIAL INSTRUCTIONS: Aerosol products represent a limited hazard and will not spill or leak unless ruptured. In case of rupture contents are generally evacuated from the can rapidly. Area should be ventilated immediately and continuous ventilate provided until all fumes and vapors have been removed. Aerosol cans should never be incinerated or burned. See Section 13 for disposal.

**REPORTING REQUIREMENTS:** Spills due to the rupture of a single aerosol can are generally below any regulatory reporting requirements. However, if larger spills somehow result, the reporting requirements of all governing agencies should be observed.

Revision 1 \* June 22, 2006

#### SECTION 7 ● HANDLING AND STORAGE

**HANDLING:** Avoid prolonged or repeated skin contact. Avoid breathing of vapors. Do not incinerate (burn) containers. Always replace overcap when not in use.

**STORAGE:** Storage of individual cans should be done in an area below 120°F, and away from heat sources. Assure can is in a secure place to prevent knocking over and accidental rupture. For storage of pallet quantities, compliance with NFPA 30B (Manufacture and Storage of Aerosol Products) is recommended. This product is classified as a Level 1 Aerosol.

# SECTION 8 ● EXPOSURE CONTROL/PERSONAL PROTECTION

**ENGINEERING CONTROLS:** General ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. Local exhaust ventilation or an enclosed handling system may be necessary to control air contamination below that of the lowest PEL rated ingredient from Section 2.

**SKIN PROTECTION:** For brief contact, no precautions other than clean body-covering clothing should be needed. When prolonged or repeated contact could occur, use protective clothing impervious to the ingredients listed in Section 2.

**EYE PROTECTION:** Safety glasses with side shields are recommended as a minimum for any type of industrial chemical handling. Where eye contact with this material could occur, chemical splash proof goggles are recommended.

**RESPIRATORY PROTECTION:** Atmospheric levels should be maintained below the exposure guideline. When respiratory protection is required, an appropriate NIOSH approved respirator for organic vapor should be worn. If respirators are needed, compliance with OSHA standard 29 CFR 1910.134 is necessary within the United States.

# SECTION 9 ● PHYSICAL AND CHEMICAL PROPERTIES

#### SECTION 12 ● ECOLOGICAL INFORMATION

**OTHER ECOLOGIC DATA:** Do not allow to enter waters, waste water, or soil. No ecological problems are to be expected when handled and used with care and as directed.

EFFECT ON THE OZONE LAYER: This product does not contain any ozone depleting ingredients.

#### **AQUATIC TOXICITY:**

# **SECTION 13 ● DISPOSAL CONSIDERATIONS**

Hazard characteristic and regulatory waste stream classification can change with product use and location. Accordingly, it is the responsibility of the user to determine the proper storage, transportation, treatment, and/or disposal methodologies for spent materials and residues at the time of disposition. All waste material must be disposed of in compliance with the respective national, federal, state, and/or local regulations.

In the United States, an aerosol container that does not contain a significant amount of liquid would meet the definition of scrap metal (40 CFR 261.1(c)(6)), and would be exempt from RCRA regulation under 40 CFR 261.6(a)(3)(iv) if it is to be recycled. If containers are to be disposed of (not recycled) it must be managed under all applicable RCRA and state regulations.
