

SAFETY DATA SHEET ElastiWrap™ Fluorescent-Burnin

Orange

SECTION 1 - IDENTIFICATION

Product Identifier

Product Name **Other Means of Identification** ElastiWrap™ Fluorescent-Burnin Orange - 15251Z None

24 hr Emergency **Phone Number**

800-424-9300

HCS 2012 / GHS Rev 3

Recommended Use and Restrictions on Use

Recommended Use Restrictions on Use

Multipurpose, removable rubber coating. None Identified

	SUPPLIER DETAILS
Name	The Eastwood Company
Address	263 Shoemaker Road Pottstown PA 19464
Phone Number	800-343-9353
Fax Number	610-323-6268

SECTION 2 - IDENTIFICATION

Hazard Classification								
HEA			PHYSICAL HAZARD	S				
Acute Tox. Oral	Mutagenicity		Unstable Explosive		Refrigerated Liq. Gas		Pyrophoric Solid	
Acute Tox. Skin	Carcinogenicity		Explosive		Flammable Liquid		Emits Flammable Gas	
Acute Tox. Inhalation	Tox. to Reproduction		Flammable Gas		Flammable Solid		Oxidizing Liquid	
Skin Irritation	STOT SE		Aerosol	1	Self-Reactive Sub.		Oxidizing Solid	
Eye Irritation	STOT RE		Oxidizing Gas		Pyrophoric Liquid		Organic Peroxide	
Resp. Sensitization	Aspiration Hazard	1	Gas Under Pressure	х	Self-Heating Substance		Corrosive to Metal	
Skin Sensitization			ENVIRONMENTAL HAZARDS (GHS Rev 3 Only)					
			Aquatic Acute		Aquatic Chronic		Ozone Depleting	
Signal Word Danger! Hazard Pictograms								
Hazard Statements	Extremely flamm airways.	able ae	erosol. Contains gas under	pressur	e; may explode if heated. I	May be	fatal if swallowed and ent	ters
Precautionary Statements								
General	Keep out of reach	n of chil	ldren.					
Prevention			ot surfaces, sparks, open ource. Do not pierce or k			No sm	oking. Do not spray on an	open
Response	IF SWALLOWED:	Immed	iately call a POISON CENT	ER or do	octor/physician.			
Storage Store in a well-ventilated place. Store locked up. Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122°F.								

SAFETY DATA SHEET ElastiWrap™ Fluorescent-Burnin

Orange

Disposal

Dispose of contents/container in accordance with local regulations. None identified.

Hazards Not Otherwise Classified Unknown Acute Toxicity

SECTION 3 - COMPOSITION / INFORMATION ON INGREDIENTS

41.5 % by wt

1 Propane 000074-98-6 2 Tert-Butyl Acetate 0000540-88-5	
2 Tert-Butyl Acetate 0000540-88-5	15 - 40
	15 - 40
3 V M & P Naphtha 0064742-89-8	10 - 30
4 Mineral Spirits 0064742-88-7	10 - 30

* Exact percentages of composition withheld as trade secret

SECTION 4 - FIRST AID MEASURES

Description of First-Aid Measures	
General	If exposed or concerned seek medical advice/attention.
Eye Contact	Immediately flush with clear water for at least 15 minutes, including under the eyelids. Consult a doctor.
Skin Contact	Remove with soap and water, rinsing and repeating for 15 minutes. Use skin cream to counter any resulting dryness. Consult a physician if irritation continues. If large skin area is affected, remove contaminated clothing.
Ingestion	Do not induce vomiting! Immediately have the victim drink plenty of water. Do not give milk or digestible oils. Keep airways free. Contact a physician. Never give anything by mouth if victim is rapidly losing consciousness, unconscious, or convulsing.
Inhalation	Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Seek medical attention if symptoms persist or if unconscious.
First-Aid Responder Protection	Wear adequate personal protective equipment based on the nature and severity of the emergency.

Most Important Symptoms and Effects, Both Acute and Delayed

Eye Contact	Liquid contact may cause pain along with moderate eye irritation.
Skin Contact	Prolonged or repeated exposure may cause skin irritation. Repeated contact may cause drying or flaking of skin. May cause more severe response if confined to skin.
Ingestion	Due to being an aerosol, the product does not lend itself to ingestion. Should ingestion occur, it may cause irritation to membranes of the mouth, throat, and gastrointestinal tract resulting in vomiting and/or cramps. Aspiration of vomit into the lungs may cause inflammation, and possible chemical pneumonitis, bronchopneumonia, or pulmonary edema.
Inhalation	Prolonged or repeated overexposure is anesthetic. May cause irritation of the respiratory tract, or acute nervous system depression characterized by headache, dizziness, staggering gait, confusion or death. Irritation of the mucous membranes, coughing, and dyspnea are also possible.

Indication of Immediate Medical Attention and Special Treatment

Notes to Physician	Treat symptomatically.
Specific Treatments/Antidotes	No information available.
Immediate Medical Attention	No information available.

SECTION 5 - FIRE-FIGHTING MEASURES

Extinguishing Media

Suitable Extinguishing Media	Water, CO2, dry chemical, or universal aqueous film forming foam
Unsuitable Extinguishing Media	Water jet

Specific Hazards Arising from the Chemical or Mixture

Decomposition Products	Oxides of carbon (CO, CO2), smoke, and/or vapors
Hazards from the Product	CONTENTS EXTREMELY FLAMMABLE AND UNDER PRESSURE. In a fire or if heated, a pressure increase will occur which may
	result in the container bursting. Vapors heavier than air may spread along the ground and travel to an ignition source.

Orange

Advice for Firefighters

Protective Actions Protective Equipment Use water spray to cool fire exposed containers as contents may rupture violently from heat developed pressure. As with any fire wear SCBA pressure-demand, MSHA/NIOSH approved, and full protective gear.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Personal Precautions, Protective Equipment and Emergency Procedures

For Non-Emergency Personnel	No action should be taken by non-emergency personnel without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spill. Remove ignition sources and provide adequate ventilation only if it is safe to do so.
For Emergency Responders	Use personal protection as recommended in Section 8. Observe precautions provided for non-emergency personnel.
Environmental Precautions	
Precautions	Keep out of drains, sewers, ditches, and waterways. Minimize use of water to prevent environmental contamination.

Methods and Materials for Containment and Cleaning Up

Containment Procedures	Product is an aerosol, therefore spills and leaks are unlikely. In case of rupture, released content may be contained with oil/solvent absorbent pads, socks, and/or absorbents. DO NOT use combustible material such as sawdust.
Cleanup Procedures	Spills from aerosol cans are unlikely and are generally of small volume. Large spills are therefore not normally considered a problem. In case of actual rupture, avoid breathing vapors and ventilate area well. Remove sources of ignition and use non-sparking equipment. Soak up material with inert absorbent and place in safety containers for proper disposal.
Other Information	Aerosol products represent a limited hazard and will not spill or leak unless ruptured. In case of rupture contents are generally evacuated from the can rapidly. Area should be ventilated immediately and continuous ventilation provided until all fumes and vapors have been removed. Aerosol cans should never be incinerated or burned. See Section 13 for disposal.
Prohibited Materials	Combustible absorbent material such as sawdust, use of equipment that may cause sparking.

SECTION 7 - HANDLING AND STORAGE

Precautions for Safe Handling General Handling Precautions KEEP OUT OF THE REACH OF CHILDREN. Avoid prolonged or repeated skin contact. Avoid breathing of vapors. Do not incinerate (burn) containers. Always replace overcap when not in use. Avoid use around open flames or other sources of ignition. Exposure to heat or prolonged exposure to sun may cause can to burst. Use only with adequate ventilation, opening doors or windows to achieve cross-ventilation. Wash hands after use. Hygiene Recommendations Do not eat, drink or smoke when using this product. Wash hands thoroughly after use. Remove contaminated clothing and protective equipment before entering eating or smoking areas. Conditions for Safe Storage Including Am Incompatibilities Storage of individual cans should be done in an area below 50 °C (122 °F), and away from heat sources. Ensure can is in a secure place to prevent knocking over and accidental rupture. For storage of pallet quantities, compliance with NFPA 30B (Manufacture and Storage of Aerosol Products) is recommended. This product is classified as a Level 3 Aerosol.

Incompatibilities Segregate storage away from materials indicated in Section 10

SECTION 8 - EXPOSURE CONTROLS / PERSONAL PROTECTION

Control Parameters

Information on the Likely Routes of Exposure

Routes of Exposure

Skin contact, skin absorption, eye contact, inhalation

Information on Physical, Chemical and Toxicological Effects

Symptoms of Exposure Asphyxia, Central Nervous System Depression, Chemical Pneumonitis, Confusion, Dermatitis, Dizziness, Excitation, Upper Respiratory System Irritation

Delayed and Immediate Effects and also Chronic Effects from Short and Long-Term Exposure

Delayed Effects	No known delayed effects.
Immediate Effects	No known immediate effects.
Chronic Effects	Reports have associated repeated and prolonged occupational overexposure to solvents with irreversible brain and nervous system damage (sometimes referred to as "Solvent or Painter's Syndrome"). Intentional misuse by concentrating and inhaling this product may be harmful or fatal.
Medical Conditions Aggravated	May aggravate personnel with pre-existing disorders associated with any of the Target Organs.
Target Organs	Central Nervous System, Eyes, Respiratory System, Skin

SECTION 13 - DISPOSAL CONSIDERATIONS

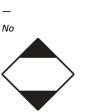

Waste DisposalCharacteristics and waste stream classification can change with product use and location. It is the responsibility of the user
to determine the proper storage, transportation, treatment, and/or disposal methodologies for spent materials and residues
at the time of disposition. All waste must be disposed of in compliance with the respective national, federal, state, and/or
local regulations.Waste Disposal of PackagingAn aerosol container that does not contain a significant amount of liquid would meet the definition of scrap metal (40 CFR
261.1(c)(6)), and would be exempt from RCRA regulation under 40 CFR 261.6(a)(3)(iv) if it is to be recycled. If containers are
to be disposed of (not recycled) it must be managed under all applicable RCRA and state regulations.Landfill PrecautionsNot availableIncineration Precautions** DO NOT INCINERATE ** CONTENTS UNDER PRESSURE **
