- Emergency telephone number: Chem-tec (800)424-9300

2 Hazard(s) identification

Classification of the substance or mixture

GHS02 Flame

Flam. Liq. 2 H225 Highly flammable liquid and vapor.

GHS08 Health hazard

Carc. 2 H351 Suspected of causing cancer.
Repr. 2 H361 Suspected of damaging fertility or the unborn child. Route of exposure: Inhalative.
STOT RE 2 H373 May cause damage to the central nervous system through prolonged or repeated exposure. Route of exposure: Inhalative.

GHS07

Skin Irrit. 2 H315 Causes skin irritation.

Eye Irrit. 2A H319 Causes serious eye irritation.

STOT SE 3 H336 May cause drowsiness or dizziness.

Additional information:

Repeated exposure may cause skin dryness or cracking.

There are no other hazards not otherwise classified that have been identified.

0 percent of the mixture consists of ingredient(s) of unknown toxicity.

- · Label elements
- · GHS label elements

The product is classified and labeled according to the Globally Harmonized System (GHS).

6 Accidental release measures

· Personal precautions, protective equipment and emergency procedures

Use respiratory protective device against the effects of fumes/dust/aerosol.

Ensure adequate ventilation.

Wear protective equipment. Keep unprotected persons away.

Keep away from ignition sources.

Protect from heat.

• Environmental precautions: Do not allow to enter sewers/ surface or ground water.

Methods and material for containment and cleaning up:

Absorb with non-combustible liquid-binding material (sand, diatomite, acid binders, universal binders). Dispose contaminated material as waste according to item 13.

Send for recovery or disposal in suitable receptacles.

Reference to other sections

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

7 Handling and storage

· Handling:

- Precautions for safe handling
 Use only in well ventilated areas.
 Prevent formation of aerosols.
 Avoid splashes or spray in enclosed areas.

 Information about protection against explosions and fires:
 Keep ignition sources away Do not smoke.
 Protect against electrostatic charges.
 Emergency cooling must be available in case of nearby fire.
 Flammable gas-air mixtures may be formed in empty receptacles.
 Fumes can combine with air to form an explosive mixture.

 Conditions for safe storage, including any incompatibilities
 Storage:
 Requirements to be met by storerooms and receptacles:
 Store in a cool location.
 Provide ventilation for receptacles.
- Avoid storage near extreme heat, ignition sources or open flame.
- Information about storage in one common storage facility:
- Store away from foodstuffs.

Store away from oxidizing agents.

• Further information about storage conditions:

Store in cool, dry conditions in well sealed receptacles.

- Keep receptacle tightly sealed.
- Specific end use(s) No further relevant information available.

Immediately remove all soiled and contaminated clothing. Wash hands before breaks and at the end of work. Do not inhale gases / fumes / aerosols.

Avoid contact with the eyes and skin.

• Engineering controls: Keep container tightly closed.

· Breathing equipment:

Use suitable respiratory protective device when aerosol or mist is formed.

Use suitable respiratory protective device when high concentrations are present.

NIOSH or EN approved organic vapor respirator equipped with a dust/mist prefilter should be used. • Protection of hands:

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

Eye protection:

Safety glasses

· Body protection: Protective work clothing

· Limitation and supervision of exposure into the environment Avoid release to the environment.

10 Stability and reactivity

Reactivity	
· Chemical stability	
 Thermal decomposition / conditions to be avoided: 	
Keep away from heat, sparks, open flames, and hot surfaces No smoking.	
Possibility of hazardous reactions	
Highly flammable liquid and vapor.	
Reacts violently with oxidizing agents.	
Reacts with acids.	
Used empty containers may contain product gases which form explosive mixtures with air.	
Can form explosive mixtures in air if heated above flash point and/or when sprayed or ator	nized.
Toxic fumes may be released if heated above the decomposition point.	
Conditions to avoid	
Keep ignition sources away - Do not smoke.	
Store away from oxidizing agents.	
Incompatible materials: Oxidizing agents

· Toxicity

• Aquatic toxicity:

1330-20-7 xylene

LC50 13.4 mg/l (pimephales promelas)

• Persistence and degradability No further relevant information available.

- · Behavior in environmental systems:
- · Bioaccumulative potential No further relevant information available.
- Mobility in soil No further relevant information available.
- Ecotoxical effects:

· Remark: Due to mechanical actions of the product (e.g. agglutinations) damages may occur.

- · Additional ecological information:
- · General notes:

Do not allow product to reach ground water, water course or sewage system.

Danger to drinking water if even small quantities leak into the ground.

- · Results of PBT and vPvB assessment
- · PBT: Not applicable.
- · vPvB: Not applicable.

• Other adverse effects No further relevant information available.

13 Disposal considerations

· Waste treatment methods

• Recommendation:

Must not be disposed of together with household garbage. Do not allow product to reach sewage system. The user of this material has the responsibility to dispose of unused material, residues and containers in compliance with all relevant local, state and federal laws and regulations regarding treatment, storage and disposal for hazardous and nonhazardous wastes. Residual materials should be treated as hazardous. • Waste disposal key: EPA RCRA Code (USA) : D001, U220, U129, U239.

· Uncleaned packagings:

• **Recommendation:** Disposal must be made according to official regulations.
