Part #40014Z

VINYL AND DASH REPAIR KIT WITH FOAM INSTRUCTIONS

The **EASTWOOD VINYL AND DASH REPAIR KIT WITH FOAM** allows you to make professional quality vehicle interior repairs on Padded Dash Panels, Door Panels, Seats, Consoles, Luggage, Clothing and much more.

INCLUDES

- An Eastwood # 40013 Vinyl Repair Kit complete with colored vinyl repair material, grain impression sheets, adhesive, hardener, heating iron and detailed instructions.
- A 12 oz. can of Semi-rigid Expanding Filling Foam.

INSTRUCTIONS

1. Clean repair area thoroughly with a good quality household or automotive spray cleaner and assess damage. If repairing flexible vinyl upholstery material, follow the detailed product instructions for color mixing and applying repair material.
2. If repairing a crack in a padded dash, door panel or other component, requiring the use of the Expanding Foam Filler, it may be necessary to remove or "scoop out" a small amount of the backing foam behind the "skin" to allow room for the Expanding Foam Filler.
3. Read the Expanding Foam can label thoroughly before proceeding.
4. Apply a very small amount of Expanding Foam to the crack keeping in mind that the foam will expand to 10 X the volume of the initial bead. Note: It is better to apply too little, let it cure and add more then to apply too much as it will spill over to the outer skin and cause permanent damage. Masking or vinyl electrical tape applied to the outer skin as close to the crack as possible will help prevent adhesion of foam to the outer skin.
5. Once the foam has fully expanded and cured, trim it back carefully with a sharp razor blade.
6. Follow the detailed Vinyl Repair product instructions for color mixing and applying repair material.
